Every year, more than 1,200 national and local aging leaders, policymakers, decision makers and business executives attend the USAging Answers on Aging Annual Conference & Tradeshow, making it the largest gathering of local aging industry professionals in the U.S.

The Conference provides the business community with its best opportunity to engage the Aging Network and key decision makers who can support your company’s business and marketing goals.

Whether you select an existing sponsorship opportunity, or ask that one be customized to meet your needs, USAging will work with you to design a Conference experience that provides your business with the greatest value.
Offering more than $8 billion worth of programs and services annually to serve more than 40 million adults age 60 and older, the nation’s 617 Area Agencies on Aging (AAAs) and more than 270 Title VI Native American Aging Programs have been the go-to local resource for home and community-based services for more than four decades. At USAging, we’re proud to be their national membership association. Our network’s expertise includes reaching special populations such as the hard-to-reach, people living with dementia or other chronic conditions, those with the greatest social and economic need, caregivers and more. And we’re committed to addressing the social care needs of a diverse aging population, including those needs that have been created by racial and health disparities and inequities.
The National Aging Network: A Critical Partner in Addressing the Social Determinants of Health

With their deep experience in providing social services and supports, growing numbers of AAAs have expanded their service portfolios to include integrated care, Medicaid managed care, care transitions, evidence-based programs, population health programs and direct-to-consumer business lines.

As a result, 47 percent of AAAs are working with hospitals and managed care organizations, Accountable Care Organizations and other health care providers and systems that recognize AAAs can help them bridge the gap between medical care and long-term services and supports for older adults and people with disabilities. And, just as important, they provide a wide range of services and supports through deep connections to their communities.

Because AAAs manage a multi-billion-dollar book of business, they are constantly looking for products and services that can help them efficiently meet their growing business needs, including tools that can help them manage provider networks, address data alignment, data management, interoperability and billing, and provide education and training to their staff and networks.

The Aging Network is also looking to learn from industry experts about innovations, products and services that can help agencies meet the needs of their payer partners, grow their businesses and continue to serve their ever-growing client base.
USAGing’s Leadership

For more than 45 years, Area Agencies on Aging have relied on USAGing as a **trusted and essential partner** to help them navigate in times of change and transformation.

To support our members in this fast-changing environment, we must be nimble, too.

We build relationships, form partnerships and foster innovative programs and services for older adults, people with disabilities and their caregivers.
