## AFTD HelpLine 866.507.7222 toll-free or [info@theaftd.org](mailto:info@theaftd.org)

AFTD's most important direct service to persons with FTD, care partners, and professionals, the HelpLine is staffed by social workers Monday–Friday during regular business hours.

## Diagnostic Checklists

If a friend or family member is concerned they might also have FTD, you can share the checklists AFTD developed to help identify red flags for the two most common types of FTD - behavioral variant FTD (bvFTD) and primary progressive aphasia (PPA). They are available in six languages: English, Dutch, French, Italian, Polish, and Spanish.

## AFTD Support Groups

AFTD offers groups for care partners or people diagnosed with FTD that are available in person or online to facilitate peer learning in a safe environment.

## Newly Diagnosed Checklist

An FTD diagnosis can be overwhelming in many ways. AFTD's Newly Diagnosed Checklist guides persons diagnosed and their families on steps to take to help adjust to the changes ahead.

## Help & Hope

A weekly e-newsletter for people on the FTD journey. Issues provide advice on support strategies, the lived FTD experience, and updates on FTD advocacy, research, and AFTD volunteer opportunities.

## Provider Letters and FTD Awareness Cards

Sample provider letters inform healthcare professionals about FTD's symptoms and ways they can help you. Printable FTD awareness cards let others know what FTD is and how it may impact behavior in a public setting.

## Comstock Grant Program

The Comstock Grant Program provides financial assistance to offset the cost of respite for family caregivers and for travel to an AFTD conference. Persons diagnosed with FTD can apply for a Quality of Life Grant for goods or services that enhance their daily life. All grants are \$500.

## Partners in FTD Care

Developed by clinicians and caregivers, this publication promotes greater knowledge and understanding of FTD and shares best care practices. We encourage you to share these with your healthcare professionals.

# Caregivers-Talk to Us, We Can Help!

There are many rewards to caregiving although caregivers may feel:

- Overwhelmed
- Financial Burdens
- Loss of personal time and privacy
- Stress from juggling many responsibilities
- Person they care for won't cooperate
- Family conflict
- Isolation from family and friends

Caregivers often put their loved one first, neglecting themselves physically, mentally, and emotionally. Caregivers may feel overwhelmed and experience emotions such as anxiety, guilt, depression, anger, frustration and/or resentment. This is a normal part of caregiving but one that needs to be paid attention to. It is not selfish for caregivers to take care of themselves.

---

Support counselors are licensed social workers who help caregivers gain more understanding of their feelings and develop skills to better handle the stresses and difficult emotions of caregiving. The one on one meetings are confidential and strive to empower the caregiver to find strength and hope within themselves.

Caregivers who received counseling said that, because of the counseling they:

- "Feel less stressed knowing about support services"
- "Know help is just a call away"
- "Gained confidence"
- "Feel better about my situation"
- "Feel supported"
- "Have somewhere to turn"
- "Feel less stress"
- "Know my feelings were all normal for the situation"
